

Moksha Jaiswal

Product Designer with 5+ Years of Experience based in Dublin, Ireland

+353-894127094 | mokshajaiswal99@gmail.com | mokshadesign.framer.website | linkedin.com/in/mokshajaiswal | Stamp 1G

SUMMARY

Product Designer with 5+ years of experience and an MSc in Interaction & Experience Design. Specialist in crafting scalable digital experiences across fintech, SaaS, B2B, B2C and AI-driven products. Expertise in end-to-end UX, design systems, and building intelligent, user-centred behaviors. Proven track record of translating complex requirements into clear solutions that align business goals with trust and usability. I am based in Dublin Ireland, with full work authorization on Stamp 1G and available for immediate start.

SKILLS

Interaction Design (IxD) • User Research • Wireframing & Prototyping • Information Architecture • Usability Testing • Visual Design • Accessibility (WCAG Compliance) • Responsive Design • Design Thinking • Journey Mapping • Task Flows / User Flows • AI Prototyping • Heuristic Evaluation • Microinteractions • Product Thinking • UX Design • Figma • Miro / FigJam • HTML / CSS (basic front-end) • Framer • Behavioral Analytics • A/B Testing • Competitive Analysis • Data-Driven Design

WORK EXPERIENCE

Superbill | Product Designer - Freelance | Ireland (Remote) Sep. 2025 - Apr. 2026

- Led end-to-end product design for an AI-powered B2B billing platform, partnering directly with founders to shape product direction from concept to delivery.
- Simplified complex invoicing, payment, and account management workflows into intuitive experiences for business users.
- Rapidly translated ambiguous product requirements into validated design solutions through iterative prototyping and close engineering collaboration.
- Built scalable interaction patterns and purposeful micro-interactions that improved usability and perceived responsiveness across core product flows.
- Balanced user needs, technical feasibility, and business priorities while designing under NDA constraints in a fast-paced startup environment.
- Contributed to product strategy discussions by identifying UX opportunities and recommending improvements based on user behaviour and product goals.

IG | Product Designer Nov. 2024 - May 2025

- Contributed to the redesign of IG's global marketing website across multiple regions, improving consistency, accessibility, and user experience.
- Optimised high-traffic landing pages, navigation, and conversion journeys, contributing to an 18% increase in sign-ins and lead generation.
- Redesigned legacy components and user flows using behavioural insights, usability testing, and iterative design improvements.
- Produced production-ready prototypes and design specifications that streamlined collaboration with engineering teams.
- Worked closely with developers during implementation, leveraging HTML and CSS knowledge to ensure design quality and responsive behaviour.
- Collaborated with cross-functional stakeholders to balance user needs, brand consistency, and commercial objectives across digital experiences.

IG Group | Product Designer Mar. 2024 - Jul. 2024

- Redesigned complex trading workflows and platform components to improve clarity, reduce cognitive load, and increase user confidence during financial decision-making.
- Conducted UX research, usability testing, and competitive analysis to identify user pain points and inform product improvements across high-value financial journeys.
- Designed interactive prototypes that accelerated stakeholder alignment and reduced implementation ambiguity during development.
- Introduced modern interaction patterns and visual improvements that enhanced usability across key trading experiences.
- Collaborated closely with Product Managers, Engineers, and Marketing teams to deliver user-centred solutions aligned with business objectives.
- Played a key role in scaling the global design system by creating and refining over 200 reusable components during migration to the new brand system.
- Founded and led "Designers' Hive," an internal initiative that fostered design collaboration, knowledge sharing, and structured critique sessions across the design organisation.

Zeta | Product Designer Mar. 2022 - Mar. 2024

- Owned the end-to-end design of enterprise fintech products used by banking and merchant operations teams, translating complex business workflows into intuitive, scalable user experiences.
- Led the redesign of Finance and End-of-Day (EOD) workflows, reducing task completion time by 20% while improving operational efficiency for internal users.

- Built and scaled a modular design system from the ground up, establishing reusable components and interaction patterns that improved design consistency and accelerated development.
- Designed dashboards, transaction flows, and operational tools for enterprise users, balancing usability, compliance requirements, and technical constraints.
- Partnered closely with Product Managers, Engineers, and QA throughout the product lifecycle - from discovery and user research to prototyping, validation, and implementation.
- Facilitated design critiques, usability reviews, and cross-functional workshops that strengthened collaboration and elevated design quality across multiple teams.
- Contributed to product strategy by translating user insights, business objectives, and technical considerations into practical design solutions.
- Ensured responsive and accessible experiences across multiple product touchpoints while maintaining consistency with the evolving design system.

Metafic | UI/UX Designer**Jun. 2021 - Mar. 2022**

- Delivered 10+ end-to-end UX/UI solutions across diverse industries (EdTech, Fitness, Social Media), consistently meeting tight deadlines and increasing client satisfaction scores.
- Led and mentored a team of 2 interns, implementing standardized design system audits that improved workflow efficiency by 25% and ensured 100% compliance with WCAG accessibility standards.
- Collaborated with PMs and developers to ship 5+ high-impact products, reducing hand-off friction and cutting development rework by 15% through clear documentation and component-based design.

Lollypop Design Studio | UI/UX Design Intern**May 2021 - Jun. 2021**

- Researched and designed "Balanco," a wellness-focused mobile application centred around healthy lifestyle habits and long-term user engagement.
- Conducted qualitative user research to understand user motivations, behaviours, and challenges related to wellness and routine building.
- Created user flows, wireframes, and high-fidelity interfaces to simplify complex lifestyle tracking experiences.
- Developed a cohesive visual language including custom iconography, calming colour systems, and accessible interaction patterns.
- Designed responsive interfaces with a focus on clarity, emotional design, and intuitive navigation.
- Explored interaction design principles and micro-interactions to create a more engaging and user-friendly experience.

Verzeo | UI/UX Design Intern**Sep. 2020 - Apr. 2021**

- Designed dashboards and responsive interfaces for EdTech products focused on improving usability and student engagement.
- Led the design of "Internspool," a responsive platform aimed at simplifying internship discovery and application workflows.
- Created wireframes, user flows, and high-fidelity prototypes to communicate design solutions effectively across teams.
- Collaborated with developers to ensure accurate implementation and responsive behaviour across devices.
- Conducted competitor analysis and basic user research to identify usability gaps and improve interaction flows.
- Delivered multiple fast-paced design projects, demonstrating adaptability and creative problem-solving in a startup environment.

Aapna MD | Freelance UI/UX Designer**Apr. 2020 - Sep. 2020**

- Designed end-to-end mobile and web experiences for a health-tech startup focused on patient trust, accessibility, and privacy-first interactions.
- Created user flows, wireframes, and high-fidelity prototypes to streamline healthcare-related workflows and improve usability.
- Collaborated closely with developers to ensure smooth implementation and maintain design consistency across platforms.
- Designed intuitive onboarding and interaction patterns that simplified complex medical and user information.
- Conducted exploratory research and competitor analysis to better understand user expectations within digital healthcare experiences.

EDUCATION**MSc in Interaction and Experience Design / GPA: 3.7/4.0****2024 - 2025**

University of Limerick, Limerick, Ireland

- Specialised in interaction design, UX research, and human-centred design methodologies across both digital and physical interfaces.
- Explored multimodal interaction systems including sound, motion, sensory feedback, conversational interactions, and interactive environments beyond traditional mobile and web platforms.
- Conducted qualitative research using interviews, usability testing, thematic analysis, journey mapping, and observational methods to uncover user behaviour and design insights.
- Worked on diverse collaborative and independent projects involving accessibility, emotional design, speculative interaction design, and emerging user experiences.
- Thesis project was recognised as one of the strongest in the cohort for its research depth, innovation, and quality of interaction design execution.

BTech in Computer Science and Technology**2017 - 2021**

Lovely Professional University, Punjab, India
